GeoSpatial Intelligence - GSI

*“**Aviation** today provides **benefits** to the society **mainly for** transport applications: i.e. it is a typical fall-out of the **second industrial revolution**. **RPAS can add**, to the existing aviation activities, **digital technologies** and **massive exploitation of information**: in other words bringing aviation in the realm of **the third industrial revolution**, and so creating highly **qualified jobs** in the **manufacturing sector**, in **operations** and in **exploitation of the information** acquired through RPAS.”*

Final report from the European RPAS Steering Group

JUNE 2013
